Judith A. Rees : School of Geography and Earth Resources, University of Hull, Cottingham Road, Hull HU6 7RX

Board of Executive Editors

Derek Diamond : London School of Economics and Political Science, Houghton Street, London WC2A 2AE

David K. C. Jones : Department of Geography, London School of Economics and Political Science, Houghton Street, London WC2A 2AE

Aims and Scope

GEOFORUM is an international, multi-disciplinary journal, global in outlook, integrative in approach and policy oriented. Its primary concern is with all aspects of the management of the human environment; an area of study broadly defined to encompass urban and regional planning, industrial development, resource allocation and the management of physical environmental systems. The journal is published four times a year and provides a forum for rapid publication of original research papers, reports and reviews.

The Executive Editors particularly wish to encourage:

1. Publication of the results of *applied* research:
   (a) Assessments of the impact of technological and economic developments on all aspects of the human environment.
   (b) Studies of policy — its formulation, implementation and effectiveness.
   (c) Analysis of resource and environmental potentialities.
   (d) Development of assessment and evaluation techniques.
2. Publication of results of research of an *international* character:
   (a) Research findings of co-operative work by international agencies or research institutes.
   (b) Comparative assessments of problems and policies in different economic, social, political and physical environments.
3. Publication of *interdisciplinary research*, particularly that which promotes better understanding of the complex interrelationships that exist within and between the physical and socio-economic systems, and which helps forge links between the natural and social sciences.
   (a) Physical constraints on policy/management options.
   (b) Socio-economic, political and legal limits to physical potentials.
